## PROFESSIONAL SUMMARY

Resourceful and results-driven Flutter Developer with hands-on experience building scalable, cross-platform mobile applications for Android and iOS. Strong command of Dart, Firebase, and RESTful APIs, with a solid foundation in Python and JavaScript. Demonstrated ability to lead full lifecycle app development — from design to deployment — while ensuring performance, maintainability, and user engagement. Passionate about leveraging clean code practices, modern UI/UX standards, and Agile methodologies to deliver impactful mobile solutions.

## TECHNICAL SKILLS

- Languages: Dart (Flutter), Python, JavaScript, Mysql
- Frameworks & Tools: Flutter, Firebase, Django, Git, REST APIs
- Mobile Technologies: Android & iOS Development, Push Notifications, Authentication
- Development Practices: Agile & Scrum, Clean Architecture, UI/UX Design Principles

## PROFESSIONAL EXPERIENCE

### Flutter Developer

Freelance / Independent Projects — Jan 2024 – Present

- Developed Aether Chat, a real-time Flutter-based messaging app with secure user authentication, multimedia support (image/audio), AI-driven features, and push notifications.
- Built a fully functional E-commerce mobile app, enabling product discovery, secure payments, user account management, and order tracking.
- Improved app load time and responsiveness by over 30% through code optimization and efficient state management.
- Collaborated cross-functionally with designers and stakeholders to turn complex business requirements into robust, maintainable applications.

## EDUCATION

Bachelor of Science (B.Sc.), Computer Science

Godfrey Okoye University — 2022 – 2026

## PROJECTS

- Aether Chat: AI-powered real-time messaging app built with Flutter using Getx management, Django and mongoDb ; includes multimedia messaging, user authentication, AI actions, and push notifications.

- Flow Chat: Real-time chat application utilizing Flutter and Firebase for seamless multi-user communication.
- E-commerce Mobile App: Flutter-based mobile shopping platform with integrated payment gateway, product catalog, and order management system.
